Data Analysis

## Experience

### **Full Software Engineer**

Zuri Team, Inc.

Apr 2022 - Present (4 months +)

A full stack engineer, I plan on the best practices to apply in a specified project depending in the scope of the project. I design software architecture, I write program codes, analyze them, test for vulnerabilities, prototype and deploy the projects to a control version.

In my role i used GCC compiler to write compile and run C language programs.

Github to control the project source files.

I use Pycharm, Anaconda and VS code IDEs to code and program python project files.

I employed Git bash, Git CLI, PowerShell and CMD Terminal to deploy the changes to the version control system storing and changing permissions of access to the project files.

I apply my software skills and best practices to deliver world class software solutions.

I used PHP, HTML, CSS, JavaScript, Python , Python Django, SQL, MariaDB to build my projects.

I apply frameworks such as Django, SQLAlchemy, Laravel, ReactJ among other frameworks to deliver the projects.

I delivered the project on time. I collaborate with my fellow mates at I\$G Zuri Internship to deliver some collaboration projects.

I use canvas, Adobe products to design my project layouts to work on showcasing the project interphase layout.

I eased mentors and mentees work helping others cope with the environment familiarizing the with the appropriate technologies and skills to be deployed at work creating a friendly work environment to all.

I showed, team player roles actively on my role. I am praised by my fellow fellows for my competitiveness, accuracy, time management, project management

## **Senior Energy Officer**

Sunking Solar - the GreenLight Planet

Nov 2020 - Present (1 year 9 months +)

I ensured that all the customer challenges on the product side is addressed accordingly, led a group of energy officers to the fields and collected much lead and sales and as a result increased the company sales due to good customer relations.

I conducted direct-to-village sales and customer opinion and hence this bettered the customer experiences with the company. I was crowned the customer service representative of the month of November 2020.

I conducted directly to village sales increasing the company sales and motivated fellow energy officers generating greater sales.

## Education

### Holberton School

Computer Science(Software Engineering), Computer Software Engineering

2022 - 2023

AS a student at ALX-HOLBERTON school< I have worked on hand on projects and completed the first milestone. The milestone entailed DevOps Engineering, C programming entailing Low Level programming. Low lelevel programming modules tackled:

C programming

Bash/ Shell scripting

FILE I/O

Currently Working on Higher level programming sharpening my technological skills in python Higher level programming skills.

### Learnovate

Bachelor of Applied Science - BASc, Computer Software Engineering

Dec 2021 - Jan 2022

Satisfactory completed A 2 months competative Software Engineering and Development program at Learnovate Nairobi Receiving a certificate of completion.

### KIRINYAGA UNIVERSITY

BACHELOR OF TECHNICAL EDUCATION IN MECHANICAL ENGINEERING  
OPTION, MECHANICAL ENGINEERING OPTION

2021 - 2025

### University of the People

Bachelor's degree, Computer Science

2021 - 2024

I am a first year in the University of The People with some little coding experience. I am passionate about computer science and Data Science. I am working towards attaining a sustainable and diversified environment full of empowerment and motivation to all.
